 REFs; definition 6 - 14
 REFs; definition and syntax 8 - 16
 REFs; syntax 8 - 16
 ROM images; creation via linker 6 - 3
 ROM; place function in 3 - 4

 Tektronix extended hex; description 8 - 7
 Tektronix hex format; description 8 - 6

 abs function 4 - 18
 absolute address 7 - 3
 absolute address; reference 3 - 4
 absolute value; find 4 - 18
 absolute value; find double 4 - 31
 acos function 4 - 19
 address; absolute 3 - 4, 7 - 3
 address; data object 7 - 3
 address; stack relative 7 - 3
 alphabetic character; test 4 - 37
 alphabetic string 4 - 37
 alphanumeric characters; test for 4 - 36
 arccosine 4 - 19
 architecture; compiler 1 - 1
 arcsine 4 - 20
 arcsine of y; compute 4 - 20
 arctangent 4 - 21, 4 - 22
 argument widening 4 - 96
 argument; function 7 - 5
 asin function 4 - 20
 assembler function code 5 - 18
 assembly code; inline 3 - 9, 4 - 17
 assembly language listing 1 - 5
 assembly language; C interface to 3 - 11
 assembly language; syntax 5 - 3
 assignment compatibility 4 - 3
 atan function 4 - 21
 atof function 4 - 23
 atoi function 4 - 24
 atol function 4 - 25
 attention sequence; description 8 - 19
 automatic data 7 - 5
 automatic data initialisation page - 26
 autos; holes in D - 4

 bank 3 - 6
 bank-switching 3 - 6
 bank-switching example 3 - 7
 binary input file; raw 8 - 3
 binary operators 5 - 12, 5 - 12
 binary-to-hex conversion page - 29
 branch shortening logic 1 - 2
 bss section; eliminate 4 - 4
 buffer to double; convert 4 - 23

buffer to integer; convert 4 - 24, 4 - 25
buffers; compare two for lexical order 4 - 53
buffers; copy from one to another 4 - 54
builtin function 3 - 9

c.pro prototype file B - 1
c.r0 3 - 13
calling environment; restore 4 - 49
calling environment; save 4 - 72
calloc function 4 - 26
case mapping 5 - 2
ceil function 4 - 27
character in set; find in string 4 - 89
character string; convert to uppercase 4 - 95
character; find first character in string 4 - 81
character; find last occurrence in string 4 - 90
character; first occurrence in buffer 4 - 52
character; write to output stream 4 - 63
characters in buffer; map 4 - 52
characters in string; map 4 - 81
characters; ASCII 5 - 8
characters; copy 4 - 34
characters; replace 4 - 89
characters; transfer of 5 - 8
checksum page - 28
clist utility 7 - 6
code generator pass of compiler D - 7
code optimization D - 9
code optimizer pass of compiler D - 9
code size 7 - 3
coersion; type 4 - 51, 4 - 56
command line 4 - 1
comments; assembly language 5 - 4
common control characters 5 - 10
common expressions; validity 5 - 13
common logarithm 4 - 48
compiler architecture 1 - 1
compiler commands 4 - 1
compiler driver 1 - 1
compiler driver 4 - 1
compiler driver output file suffixes 4 - 5
compiler driver; default behavior 4 - 1
compiler driver; introduction 4 - 1
compiler optimizations 1 - 2
compiler options 4 - 1, 4 - 1
compiler; introduction 1 - 1
compiler; invoke 4 - 1
compiler; modify operation B - 1
compiler; parsing pass D - 4
compiler; run 4 - 1
conditional expressions 4 - 3
configuration byte; in global header 6 - 15
control characters; map to percent signs 4 - 38
control characters; test for 4 - 38

cos function 4 - 28
cosine 4 - 28
create romable images page - 26

data object 7 - 3
data object; scope 7 - 3
data object; type 7 - 3
data representation 3 - 13
data; automatic 7 - 5
debug symbol table 7 - 2
debugger; line format 7 - 1
debugging 1 - 1, 1 - 5
debugging information 7 - 1, 7 - 3
debugging information; data 7 - 3
debugging support 7 - 1
decimal digit string to number; convert 4 - 39
decimal digit; test for 4 - 39
default action; compiler 4 - 2
delete character; test for 4 - 38
di instruction 3 - 10
directives; allocation of storage 5 - 15
directives; assembler 5 - 3
directives; operands 5 - 3

ei instruction 3 - 10
error detection 5 - 6
error listings 4 - 8
error message; check for 4 - 87
error messages 1 - 5, 4 - 2, 4 - 3, 5 - 16, 5 - 5, A - 1
errors; pass one 5 - 16
errors; pass two 5 - 16
executable images; translation 8 - 2
executable; relocate at runtime 5 - 4
exp function 4 - 30
expansion of preprocessor macros D - 1
expansions; pass one 5 - 6
exponential; compute 4 - 30
expressions 5 - 12, 5 - 4
expressions; integer constant 1 - 2
extended hex format 8 - 3
extensions to ANSI 3 - 11
extensions; to files output by compiler 4 - 6
external identifiers 3 - 11

fabs function 4 - 31
file length restriction 7 - 2
filename; find within directory pathname 4 - 90
files; merging listings 8 - 13
files; pagination of output 8 - 19
fill characters; propagate in buffer 4 - 55
floating point formats 5 - 8
floating point library 4 - 3
floating point support 4 - 3
floor function 4 - 32

format description 4 - 68
format specifiers; C library 4 - 58
format; Intel hex record 8 - 4
format; Motorola S-record 8 - 5
format; Tektronix extended hex files 8 - 7
format; Tektronix hex 8 - 6
format; UNIX system libraries 8 - 11
format; Whitesmiths standard library 8 - 11
formats; floating point 5 - 8
formats; output 4 - 58
formats; retranslate page - 28
formatted argument; output to buffer 4 - 76
formatted arguments; output 4 - 58
formatted arguments; output to stdout 4 - 58
formatted input; read 4 - 68
formatted input; read from string 4 - 79
formatted string; conversion specifications 4 - 58
free function 4 - 33
freestanding programs; use of linker 6 - 2
function argument 7 - 5
function codes; assembler 5 - 18
function text 3 - 11
function; @port 3 - 11, 3 - 11
function; builtin 3 - 9
function; place in ROM 3 - 4

gencmd utility; Digital Research 8 - 2
getchar function 4 - 34
gets function 4 - 35
graphic character; test for 4 - 40
graphic characters; output only 4 - 40

halt instruction 3 - 10
hardware interrupts 3 - 11
header; value of identification byte 6 - 10
headers; setting 8 - 19
heap space 4 - 26
heap space; free 4 - 33
heap; control 6 - 19
hex digit; test for 4 - 46
hex format; translate back to object image page - 28
hex; default output format 8 - 3
hexadecimal digit; accumulate 4 - 46
hyperbolic arccosine; compute 4 - 47
hyperbolic cosine 4 - 29
hyperbolic sine of x 4 - 75
hyperbolic sine; compute 4 - 30
hyperbolic tangent 4 - 93

identification byte; value 6 - 10
identifier names 5 - 7
in-circuit emulator 7 - 1
inline assembly code 3 - 9, 4 - 17
inline machine instructions 3 - 9

listings; source line references 4 - 8
listings; use of pr 8 - 19
lnk80 3 - 8
local symbols 5 - 10
log function 4 - 47
logarithm; natural 4 - 47
longjmp function 4 - 49
lowercase character; test for 4 - 41
lowercase; convert to 4 - 45
lowercase; convert to uppercase 4 - 95

machine instructions; inline 3 - 9
magic number; value 6 - 15
malloc function 4 - 50
map files; description D - 2
mapping cases 5 - 2
max function 4 - 51
maximum; set new level 4 - 51
maximum; test for 4 - 51
memchr function 4 - 52
memcmp function 4 - 53
memcpy function 4 - 54
memory location; reference 3 - 4
memory reference; absolute 3 - 4
memory; allocate new 4 - 67
memset function 4 - 55
min function 4 - 56
minimum; set new level 4 - 56
minimum; test for 4 - 56
mnemonics; instruction 5 - 3
mnemonics; operands 5 - 3
modify compilation 4 - 2
multi-instruction line 7 - 2
multi-line instruction 7 - 2
multiple byte instructions 3 - 9

name; symbol table 5 - 16
names; symbol table 5 - 2
natural logarithm 4 - 47
negative integer; round to 4 - 32
numeric labels 5 - 10
numeric label block 5 - 11
numeric values; expressions of 5 - 7

object code file; production 5 - 6
object code listing 1 - 5
object code output 5 - 4
object code; skeleton 5 - 4
object files; check size and configuration 8 - 23
object files; examine 8 - 23
object files; output symbol table data 8 - 23
object module format 6 - 2
operands; directives 5 - 3
operands; mnemonics 5 - 3

optimizations; compiler 1 - 2
 options; compiler 4 - 1, 4 - 1
 options; request 4 - 2
 output formats; specify 4 - 58
 output redirection 5 - 4
 output streams 5 - 4
 output; object code 5 - 4
 overlap text and data sections 6 - 9

 page heading; default 8 - 19
 page title; standard 8 - 19
 parsing pass; explanation D - 4
 pass one errors 5 - 16
 pass one outputs 5 - 6
 pass two errors 5 - 16
 phase angle of vector; find 4 - 22
 positive integer; round to 4 - 27
 pow function 4 - 57
 pr utility 8 - 19
 prdbg utility 7 - 3, 7 - 5
 preprocessor macro expansion D - 1
 printable characters 5 - 10
 printable characters; output only 4 - 42
 printf function 4 - 58
 private name regions; use of 6 - 20
 privileged instruction opcodes 3 - 9
 producing unimplemented instruction codes 3 - 9
 program counter 5 - 3
 program listing 5 - 16
 program section size 5 - 2
 programmable options B - 1, B - 4
 programmable options; create B - 3
 prototype file 1 - 1, 4 - 2, B - 1
 psects 5 - 4
 pseudo registers 3 - 12, 3 - 13
 pseudo-random number; generate 4 - 65
 pseudo-random number; seed 4 - 78
 punctuation character; test for 4 - 43
 punctuation characters; collect into buffer 4 - 43
 putchar function 4 - 63
 puts function 4 - 64

 rand function 4 - 65
 random number generation 4 - 78
 realloc function 4 - 66
 redirection of output 5 - 4
 registers 3 - 12
 rel80 utility 8 - 23
 relocatable code 5 - 1
 relocatable object image; header 6 - 10
 relocate executable at runtime 5 - 4
 relocation codes; meaning to rel80 8 - 23
 request options 4 - 2
 reserved instruction opcodes 3 - 9

reti instruction 3 - 10
rotate vector through angle 4 - 28
run the compiler 4 - 1
runtime relocation of executable 5 - 4

sbreak function 4 - 67
scan tables 1 - 2
scanf function 4 - 68
scope 7 - 3
section attributes; linker 6 - 16
section; definition 6 - 1
seek address; definition 6 - 15
segment; definition 6 - 1
setjmp function 4 - 72
sin function 4 - 74
sine in radians 4 - 74
size; program section 5 - 2
skeleton object code 5 - 4
software interrupts 3 - 11
source line conventions 5 - 6
source line references; listings 4 - 8
source listings 7 - 6
space; allocate 4 - 26
space; allocate on heap 4 - 50
space; reallocate on the heap 4 - 66
span dependency 5 - 5
specify output formats 4 - 58
sprintf function 4 - 76
sqrt function 4 - 77
square root; compute 4 - 77
srand function 4 - 78
sscanf function 4 - 79
stack and heap; control 6 - 19
stack pointer 3 - 1
stack relative address 7 - 3
stack space 4 - 33
standard library format; Whitesmiths 8 - 11
standard; ANSI C 4 - 4
start address 7 - 3
stdin to stdout; copy 4 - 64
storage boundaries; enforcing D - 4
strcat function 4 - 80
strchr function 4 - 81
strcmp function 4 - 82
strcpy function 4 - 83
strcspn function 4 - 84
streams; output 5 - 4
string; copy n length 4 - 88
string; find length 4 - 85
string; look for in two buffers 4 - 53
strings; compare for lexical order 4 - 82, 4 - 87
strings; concatenate 4 - 80, 4 - 86
strings; copy one to another 4 - 83
strlen function 4 - 85

strncat function 4 - 86
 strncmp function 4 - 87
 strncpy function 4 - 88
 strpbrk function 4 - 89
 strspn function 4 - 91
 structures; holes in D - 4
 suffixes; appended to output of compiler passes 4 - 6
 suffixes; compiler output 4 - 5
 symbol code; description 6 - 12
 symbol table 5 - 16, 5 - 5
 symbol table print routine 5 - 6
 symbol table; display 5 - 2
 symbol table; format of 5 - 17

 tables; jump 1 - 2
 tables; scan 1 - 2
 tables; sorted 1 - 2
 tan function 4 - 92
 tangent in radians 4 - 92
 temporary file suffix; modify 4 - 6
 terms within expressions 5 - 12
 terms; prefixes of 5 - 12
 text line; get from input buffer 4 - 35
 text streams 5 - 16
 text/data section overlap 6 - 9
 text; put to output buffer 4 - 64
 tokens 5 - 6
 tolower function 4 - 94
 toupper function 4 - 95
 translate executable images 8 - 2
 type 1 line number information 7 - 2
 type 2 line number information 7 - 2
 type cast 4 - 26
 type casting 4 - 51, 4 - 56
 type checking 4 - 3, 4 - 4
 type checking; strength of D - 5
 type definition 4 - 96
 type names 4 - 96
 type qualifier; @builtin 3 - 9
 type qualifier; @port 3 - 11
 type; data object 7 - 3

 unary operators 5 - 12
 unimplemented instruction codes; producing 3 - 9
 uppercase character; test for 4 - 45
 uppercase; convert to 4 - 41
 uppercase; convert to lowercase 4 - 94
 user diagnostics A - 1

 va_arg function 4 - 96
 va_end function 4 - 98
 va_start function 4 - 100
 values; symbol table 5 - 2
 variable length argument list 4 - 100, 4 - 98
